

Average 4th Highest Daily 8-Hour Ozone for 1995-1997

■ MSA counties

● 17 counties with avg. 4th high .085 ppm or higher

NOTE: Based on EPA final standard of .085

- Compliance with new NAAQS will likely be based on 1997-1999 ozone seasons
- Additional counties may be involved in emission reduction strategies
- Nonattainment designations may not follow county boundaries
